

Synamics Grande  
Specialist back care seating for all

Since its introduction in 1999, **Spynamics** has evolved from a single chair into the most comprehensive range of ergonomic seating for all shapes and sizes from 4'10" to 6'10" with a maximum weight guarantee of 30 stones.

## Spinal Dynamics

The first **spynamics** chair was designed in a modular fashion ensuring that each of the key areas of the spine received optimal support. Created together with the expertise of osteopath Stephen Green, we have used state-of-the-art material technologies combined with the latest in adjustable seating controls to bring the concept of **spinal dynamics** into the workplace.

The unique feature of **spynamics** is the **triangulation of support** provided by the pelvic module cushion and the two way adjustable lumbar. These combine to provide back comfort that surpasses all other orthopaedic chairs.

The **spynamics** range of chairs promote correct seating posture thereby aiding those with existing back complaints as well as helping others to avoid potential problems.

Triangulation of Support

# fitting you to your chair

At Albion Chairs we strongly believe in supplying the right chair to suit your size and shape, and your working environment. With this in mind we carry out chair fittings at your desk or workplace to identify the best chair.

## key

- 1 Body seat height, i.e. underside of knee to floor (popliteal to floor height)
- 2 Seat length, i.e. buttocks to underside of knee (buttock to popliteal length)
- 3 Hip width (width of bitrochanter)
- 4 Operator eye height, i.e. buttocks to eye height (sitting eye height or plane of vision to seat) (see note)
- 5 Body armrest height, i.e. buttock to elbow (underside) (elbow to seat height)
- 6 Shoulder height, i.e. buttocks to shoulder (sitting shoulder height) (see note)
- 7 Desk height, as shown
- 8 Armrest separation, i.e. elbow to elbow breadth

*note: Dimensions 4 and 6 can be measured either from the seat squab or from the floor*

[Download the measurement sheet from our website](#)

## correct sitting

We help you achieve correct sitting by making the correct seat for you, by encouraging your pelvis to achieve your seated 'neutral' position and by fitting your back to the correct combination of our two way adjustable lumbar and one of our 14 back shapes. The underseat mechanism will further help you find the optimum seat height, back and seat tilt while ensuring your feet touch the ground and your arms are at 90 degrees to the keyboard.
